

Dear Parents:

Thank you for taking the time to consider Word of God Christian Academy. It would be our pleasure to serve your family by providing your child(ren)'s educational needs. Today's world has become a very confusing place for the old and even more so for the young. In his book "Kingdom Education" Glen Schulz said it this way – "Today, we find ourselves reclining from more than four decades of moral decline in society. Crime rate are soaring, the family unit is disintegrating, and the church has lost much of its ability to be salt and light to the world. Many experts claim that education is the only hope for tomorrow. However, the education now in place has removed God and his word from its classroom. We stand in opposition to the "progressive" education predominately used in our public schools today, in which the emphasis is upon the questioning of authority, the innate goodness of man, the suppression of discipline, the relativity of all things (including morals), omitting God, His word and prayer from the educational process. Therefore, all the efforts to improve the educational programs have only led to further problems and greater frustrations for many parents." In light of this, making a decision to place your child(ren) in a Christian school will truly be the right thing to do. We trust the following information will be helpful as you seek God's will for the education of your child(ren).

Sincerely,

Anesha Pittman
